

All our trees come fully decorated with warm white LED lights included. Below is the size of the actual tree, this does not include the top decorations which would extend the trees height by an additional 30 – 40cm. We have frosted trees available in the 2m Slimline and 2.1M Deluxe sizes which are the same price. Where possible trees are pre decorated off site and our installation team only have to position, turn on the lights and arrange the gifts underneath if you have ordered them. This means less disruption for you on the day of installation.

All prices are GST exclusive and delivery is priced depending on location and quantity.
